Work Experience

Software Engineer *Signet Jewelers · Fort Wayne, IN · Oct 2024-Present*

- Modernized deployment operations from a monolithic single-artifact release to an independently deployable decoupled system, boosting release frequency from monthly to as needed while maintaining zero application downtime
- Transformed a monolithic legacy system into a modular React/C# stack, decoupling domain logic to enable independent deployments and faster feature iteration
- Refactored backend data layer in C#, eliminating duplicate processing and improving system maintainability

Software Engineer *Sparq · Fort Wayne, IN · May 2021-Oct 2024*

- Aligned technical architecture with customer requirements, reducing rework and accelerating time-to-value
- Reduced post-launch defects through unit testing and code review discipline, improving release reliability
- Designed and implemented scalable, modular, API-centric architectures using C#, React, and AWS, streamlining development with Git and Azure DevOps CI/CD pipelines

Software Engineer *Ontario Systems · Muncie, IN · May 2018-May 2021*

- Migrated legacy desktop app to modern web stack, improving accessibility and reducing page load time by 90%
- Increased developer productivity by automating environment setup with Docker, reducing setup time by over 93% (from 8 hours to 30 minutes)
- Built JavaScript applications in Agile sprints, balancing velocity with code quality and maintainability standards

Education

Taylor University · Bachelor of Science in Computer Science · Graduated Jan 2018

Skills

- Backend: C#, .NET, Node.js, Python, Java, Go, C/C++, SQL, RDS, Entity Framework, RESTful API, CRON
- Frontend: HTML, CSS, TypeScript, React, Angular, Bootstrap
- DevOps: AWS, Azure, EC2, Lambda, Docker, CI/CD, Git, Infrastructure
